# Executive Summary Report

## Characteristics Based Market Adjustment for 2007 Assessment Roll

**Appraisal Date: 1/1/2007- 2007 Assessment Roll**

**Area Name / Number:** Northeast King County; Areas 370, 375, 380, 385, 390, 395, 400, 425, 430, 435, 460 and 490.

**Previous Physical Inspection: 2001-2006**

**Sales - Improved Summary:**

Number of Sales: 6,557

Range of Sale Dates: **1/1/2004 to 12/31/2006**

<b>Sales – Improved Valuation Change Summary</b>						
	<b>Land</b>	<b>Imps</b>	<b>Total</b>	<b>Sale Price</b>	<b>Ratio</b>	<b>COV</b>
<b>2006 Value</b>	\$39,600	\$186,500	\$226,100	\$253,300	89.3%	14.40%
<b>2007 Value</b>	\$47,400	\$203,400	\$250,800	\$253,300	99.0%	14.18%
<b>Change</b>	+\$7,800	+\$16,900	+\$24,700		+9.7%	-0.22%
<b>%Change</b>	+19.7%	+9.1%	+10.9%		+10.9%	-1.53%

\*COV is a measure of uniformity, the lower the number the better the uniformity. The negative figures of -.22% and -1.53% actually represent an improvement.

**Sales used in Analysis:** The sales sample includes all condominium residential living unit sales verified as good. The sample excludes commercial units, parking units, and condos in use as apartments. A listing of sales included and sales excluded from the analysis can be found in the Assessor's files located in the Commercial/Business Division.

<b>Population - Improved Parcel Summary Data:</b>			
	<b>Land</b>	<b>Imps</b>	<b>Total</b>
<b>2006 Value</b>	\$44,300	\$188,400	\$232,700
<b>2007 Value</b>	\$53,300	\$207,900	\$261,200
<b>Percent Change</b>	+20.3%	+10.4%	+12.2%

Number of improved Parcels in the Population: **15,357**

The population summary above includes all residential condominium living units. It excludes parking storage and moorage units and condominiums with commercial responsibility such as apartments and office buildings. A list of all parcels in the population can be found in the Assessor's files located in the Commercial/Business Division.

**Summary of Findings:** The analysis for this area consisted of a general review of applicable characteristics such as neighborhoods, living area, floor location, number of bedrooms and fireplaces. The analysis results showed that several characteristic-based and neighborhood-based variables needed to be included in the update formula in order to improve the uniformity of assessments throughout the area.

The Annual Update Values described in this report improve assessment levels, uniformity and equity. The recommendation is to post those values for the 2007 assessment roll.

## Part One – Premises of the Mass Appraisal

### ***Appraisal Team members and participation***

Craig Johnson Commercial West District Appraiser II performed the analysis and produced the Annual Update report. Betty Johnson, Commercial West District Senior Appraiser, reviewed the process and results.

### ***Assumptions & Limiting Conditions***

Sales data is derived from real estate excise tax affidavits and is initially reviewed by the Sales Identification Section of the Accounting Division. The analyst made further verification of sales in office. Time constraints prohibit further verification of sales information.

### ***Data Utilized***

Available sales that had closed from 1/1/2004 through 12/31/2006 were considered in this analysis. The sales and population data were extracted from the King County Assessor's Condominium database.

### ***Sales Screening for Improved Parcel Analysis***

Sales removal occurred for parcels meeting the following criteria:

1. Assigned or owned parking
2. Assigned or owned storage units
3. Assigned or owned moorage
4. Multi-parcel or multi-unit sales
5. Sales of commercial use or apartment use units
6. Others as identified as non-market sales

### ***Scope of the Appraisal***

The income and cost approaches are not applicable to residential condominium valuation. Most condominium units are owner-occupied and not income producing properties. Cost is not an accepted approach because there is no accurate way to allocate building costs among the individual units. Therefore, we rely solely upon the sales comparison approach to develop a valuation model. Our sales sample consists of 6,557 residential living units that sold during the 36-month period between January 1, 2004 and December 31, 2006. The model was applied to all units. Direct sales comparison was used to value exception parcels, which are typically parcels with characteristics that are not adequately represented in the sales sample on variables Such as size, condition, view or quality. Those parcels were adjusted to the model based on observations and general appraisal techniques. If applicable, exception parcels are listed in the addenda of this report.

The Condo Crew does not value condominium land or commercial condominiums, which are the responsibility of geographic and specialty appraisers.

## Part Two – Presentation of Data

### ***Identification of the area***

#### **Name or Designation**

Northeast King County

#### **Boundaries**

The Northeast King County area is an irregular shape and is roughly defined by the following.

North Boundary – The King-Snohomish County Line

East Boundary – The Snoqualmie National Forest

West Boundary – East Shoreline of Lake Washington

South Boundary – SR 520

#### **Maps**

Maps of the Specialty Neighborhoods included in the Northeast King County area are in the addenda of this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

#### **Area, city, neighborhood, and location data**

The Northeast King County area includes specialty neighborhoods 370: Kirkland, 375: Overlake, 380: Juanita, 385: Bothell 390: Inglewood, 395: Kingsgate, 425: Woodinville, 430: Redmond, 435: Rose Hill, 460: Duvall, and 490: Outlying Northeast Areas.

Zoning and legal/political consideration

Zoning restrictions, whether county or local, are displayed on Assessor's maps and are shown as a land characteristic in the Assessor's property characteristic database. Local jurisdictions exercise authority over local land use and community planning. Regulations regarding zoning are found in their local ordinances.

#### **Land use data**

The Commercial Appraisal Section records Assessor's land use codes, which identify the present land use. This data resides in the Assessor's database and is available upon request.

## Part Three – Analysis of Data and Conclusions

### ***Highest and best use analysis and location of conclusions***

Based on neighborhood trends, both demographic and current development patterns, the existing buildings represent the highest and best use of most sites. The existing use will continue until land value, in its highest and best use, exceeds the sum of value of the entire property in its existing use and the cost to remove the improvements. We find that the current improvements do add value to the property, in most cases, and are therefore the highest and best use of the property as improved.

### ***Sales comparison approach model description***

The chosen adjustment model was developed using multiple regression. The 2007 assessment ratio (Assessed Value divided by Sale Price) was the dependent variable.

Northeast King County area sales were analyzed and it was observed that properties were increasing at an average rate of approximately 11% per year. A Multiple regression equation was then formulated based on sales and property characteristic data found in the Assessor's records. Using regression analysis, we specify property characteristics, such as age, neighborhood, size, and number of bedrooms, and applied an adjustment value to those characteristics that were found to have a profound affect on market value. The regression model, when applied, supports the overall average market increase. Therefore, the model was used to value all condominium properties in this area. A list of all sales used in the analysis is included in the addendum of this report.

### **Model specification**

The ***regression model*** for neighborhoods **370, 375, 380, 385, 390, 395, 400, 425, 430, 435, 460 and 490** includes the following data characteristics:

1. Building Quality
2. Unit Location
3. Mountain View
4. Top Floor Units
5. Affordable Housing
6. Handicapped Units and
7. Neighborhood

The definitions of data characteristics included in the model are in the Condominium Coding manual, which is available upon request.

## Model calibration

The **regression model** for neighborhoods **370, 375, 380, 385, 390, 395, 400, 425, 430, 435, 460 and 490** was calibrated using selling prices and property characteristics as follows:

\*EMV= 2006 total value / .8824115-3.011263E-02\*BQUAL2+ 7.623288E-02\*BQUAL3-8.687372E-02\*UNITLOC4+ .0276044\*AVGMTNVIEW+ 2.888244E -9.021997E-03\*TOPFLOOR+ .0990524\*NBDH435+ 9.779483E-02\*NBDH460+ 4.986518E-02\*NBDH490+ 2.993862E-02\*NBDH370+ 3.096978E-02\*NBDH380+ 2.867096E-02\*NBDH400+ 1.894086E-02\*NBDH425+ 5.362876E-02\*AFFHSNG+ 6.825958E-02\*HNDICAP

The resulting total value is rounded down to the next \$1,000.

\*EMV stands for Estimated Market Value and represents the modeled value for the 2007 assessment year.

## **Model validation**

Detailed regression statistics validating the model are shown in the ratio reports in the addendum of the Northeast King County area report.

Craig Johnson reviewed the projected values for accuracy and correctness.

## ***Reconciliation and Conclusion.***

### **Ratio study**

A ratio study was completed to evaluate the results of our revalue efforts. This study shows the mean-weighted ratio of previous assessed value to selling price. Ratio reports are included in the addenda of this report.

### **Conclusions:**

Review of the resulting values and ratios indicate that the statistical model improves assessment levels, consistency and equalization. It is the recommendation of this report that the values be posted for the 2007 Assessment year.

### COMMENTS:

Residential Condominiums throughout areas 370, 375, 380, 385, 390, 395, 400, 425, 430, 435, 460 and 490.

Although the normality test indicates that the sales ratios are not normally distributed, the small difference between the mean and median ratio suggests that the departure from normality is minimal, and that the statistics for the Arithmetic Mean Ratio, COV, Confidence Limits and Recommended Minimum Sample Size are still valid indicators of assessment performance.
